### 1. Introduction

Business Micro, Small Intermediate (MSMEs) is foundation important for economy Indonesia. MSMEs not only contribute to Product Domestic Gross (GDP), but also become key in absorption power Work. Based on data from Ministry Cooperative SMEs (Ministry of Cooperatives SMEs) shows that MSMEs contribute around 60 percent to Indonesia's GDP. Furthermore, MSMEs play a vital role in job creation, with the ability to absorb more than 100,000 workers. from 96 percent power Work in Indonesia (Ministry MSMEs, 2024). MSMEs play a role They are crucial for economic equality because they are spread across various regions, creating jobs, reducing inequality, urbanization. In addition to improving public welfare, Indonesian MSMEs are also able to compete in the international market by utilizing the internet marketplaces to export to various countries (Amartha, 2024).

Industry Textiles Product Textiles (TPT) in Indonesia is Wrong One component key to the country's economic development. As a leading export commodity, this sector not only

It not only makes a significant contribution to the country's foreign exchange earnings, but also plays a vital role in absorbing labor meeting the clothing needs of the domestic market. The textile textile industry has a significant influence on Indonesia's Gross Domestic Product (GDP), with contribution to year 2021 revolves around between 1.5 to 2 percent according to data Ministry of Industry. Furthermore, this industry also impacts other sectors, such as agriculture, which supplies raw cotton logistics that support product distribution.

Based on survey Association Textiles Indonesia (FIRE), industry TPT absorb around 2 million direct workers 4 million indirect workers in the same year. In the ever-growing business world, distro t-shirts have emerged as

an attractive business opportunity in Indonesia. With a predominantly young population, demand for trendy fashion lifestyles is increasing. Clothing is a vital human need, fashion trends play a role in expressing creativity in clothing production.

The height interest public to clothes make industry This develop rapidly. One of attention main is opportunity business shirt distribution, because shirt This considered near with the image of young people expressing their feelings thoughts. The development of distro t-shirts has increased, as evidenced by the emergence of various brands positioning themselves as part of urban culture a youthful spirit, promoted through social media (Adha, 2024). The distro t-shirt industry in Makassar City has shown significant growth, especially among the younger generation.

With a predominantly young population, Makassar has a large diverse market for distro T-shirts. This segment is important because they tend to follow trends. mode look for clothes Which stylish unique. Lots brands local in City Makassar Which has earned recognition its quality is on par with foreign brands. Several local distributors even sponsor major events in the city.

Distro t-shirts often offer the latest most unusual designs, making them an attractive option for consumers seeking self-expression through fashion (Aswan, 2018). Distro clothing stores continue to thrive in Makassar, providing opportunities for young entrepreneurs to innovate in product design marketing. Wrong One business in field This is Bajiki Store where business This provide A local distro t-shirt brand known for its creative, high-quality designs, Bale Kaos Makassar also offers a variety of attractively designed t-shirts at affordable prices.

Additionally, Kampoeng Merdeka Clothing produces various types of clothing, including distro t-shirts, with a local approach that reflects local culture (Aswan, 2018). Unggul Taman is a creative industry operating in the crafts sector in Makassar, South Sulawesi. Established in 2006, Unggul Taman continues to operate. This by a entrepreneur Which own vision for create products crafts that quality tall beneficial for public. With Spirit dedication Which high, this business has succeeded in attracting the interest of many customers, both in the local area from outside the area.

Income Superior Park insignificant This has become a driving factor for Unggul Taman to develop its business products by diversifying its business into a distribution business. However, before diversifying, a feasibility study is required to determine whether the business will be profitable. business diversification plans are worth pursuing, matter This done for avoid various risk loss financial Which may be faced in the future also to avoid wrong decision making.

According to Nurjannah, as cited in Rizal et al. (2024), a business feasibility study is an in-depth analysis study of a business that is about to be or has been launched, in this case to determine its feasibility. Through this in-depth analysis, various aspects can be identified, such as market marketing, financial aspects, management aspects, technical operational aspects, which are necessary to determine whether the business will be successful sustainable in the long term.

Studies eligibility business important for development business Because can allows to address where how it will operate. A business feasibility study can also identify potential obstacle Which can hinder the operation recognize amount funds needed to run business. The importance of feasibility studies based on the organization's desire to get it right before committing resources, time or budget. A studies eligibility business can disclose ideas new Which can completely change the scope of the project. Conducting a feasibility study will be beneficial for business owners because it gives them other stakeholders a clear picture of the proposed project (Manan et al., 2024).

## 2. Methods

This research uses a qualitative method with a descriptive approach. Qualitative research is approach Which display study Which produce data descriptive in the form of written or spoken words from people and observed behavior. Even though there is quantitative data such as in the financial aspect, the data results from this aspect will still be explained descriptively based on the results of the research conducted (Sugiyono, 2013).

On study This, researchers use two source data, that is First source data primary in the form of text derived from the results of interviews and observations with the owner of the Unggul Taman business to examine aspects related to the market and marketing, management aspects, technical and operational aspects And aspect finance. Source data second that is data secondary Which covers information which are already There is And can accessible by researchers with do studies document start from article, books, e-books, journals, websites related to this research (Sembiring et al., 2024).

The data collection techniques used in this study were first, direct observation at the Unggul Taman store by the researcher to obtain supporting data for the study. The researcher also conducted documentation using a smartphone as an instrument. Second, data collection was conducted through direct interviews. This approach aimed to obtain in-depth information regarding market and marketing aspects, management aspects, technical and operational aspects, and financial aspects of the Unggul Taman business. The researcher selected five

informants, including informants from the Unggul Taman business owner and several Unggul Taman customers. This aimed to obtain information which specific related with process business Superior. Technique interview in this study, structured interviews were used in which the researcher had prepared a list of questions in advance to be asked to the informants.

### 3. Results and Discussion

Superior Park is one of MSMEs that move in field craft especially pots flower which own plan for do diversification business with do sales of new products, namely distro. This MSME has been established since 2006. At the beginning of the business, Unggul Taman had nine permanent employees, but after moving locations, Unggul Taman currently only has one employee. Not fixed. Unggul Taman is located on the roadside and in the center of Makassar City, making it strategically located. The target market for Unggul Taman's new product is the general public, such as students and workers in Makassar City, particularly in Panakkukang District. Unggul Taman's location is also close to several offices and campuses.

#### Aspect Market and Marketing

Markets and marketing are two inseparable elements in the business world. These two elements are highly interdependent and influence each other. In other words, every market activity is followed by marketing activities, and every marketing activity aims to find or create a market. Marketing facilitates transactions by aligning products or services with consumer needs and desires. Market analysis encompasses various factors such as market potential, competitive intensity, achievable market share and effective marketing strategies. Researching market potential helps identify growth opportunities and appropriate market segmentation. A sound marketing strategy can help businesses achieve their target market share through various approaches such as promotion, pricing, distribution, and effective communication. With in-depth analysis, business ideas can be developed according to market needs and desires, helping to design competitive business strategies and increasing the chances of success in the market (Hidayat and Prasetyo, 2022).

The results of the interview with the owner of Unggul Taman, it was found that information on market and marketing aspects directly obtained, power Superior Garden obtained is This business has an official business permit as proof of legality, the business location is in a strategic place so that it is easy for consumers to reach, the products offered are very diverse with many... choice design And including service manufacturing design in accordance request customer, Affordable product prices and supporting facilities are available for consumer convenience. Overall excellence This become strength main thing that can improve superior competitiveness of the park in market.

**Picture 1.** Floor plan Location Superior Park  
Source: Researcher Data Processing Results 2025.

Based on observation results at the Unggul Taman office, the location lots student because near from a number of campus and lots worker, so that the location is suitable for done distribution business. Location Superior Park is at in edge road so that many people pass by every day, this can help increase public awareness of the existence of Unggul Taman.

A SWOT analysis is a method for identifying internal factors, including strengths and weaknesses, as well as external factors, including opportunities and threats, within a structure such as an organization, industry, country, or region. The advantage of this analysis lies in its ability to measure the strengths of the object under study, thus determining its competitiveness compared to other institutions. A weakness of SWOT analysis is that the mapping of strengths and opportunities is only temporary, and the data obtained cannot be used as a permanent reference for the future. A SWOT analysis allows a company to assess its strengths, identify existing weaknesses, capitalize on available opportunities, and anticipate and avoid various threats it may face (Cipta, Hendra, and Hatamar, 2020).

The weaknesses of Unggul Taman that were found were that the limited number of employees was an obstacle in business operations, the promotions carried out were still not optimal because they only relied on uploads on applications such as WhatsApp and Facebook and there were other competitors who... offer product

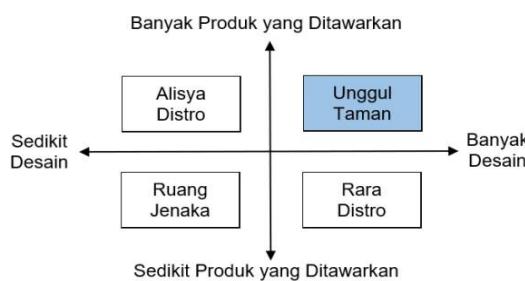

similar with quality Which more good. Recognize weakness This It is important that Unggul Taman can plan improvement strategies to increase its competitiveness.

Unggul Taman's potential lies in the fact that clothing is a basic necessity that everyone constantly needs. The business's proximity to several offices and campuses provides an opportunity to build strong relationships with potential customers in the surrounding area. The strategy of attracting new customers by offering special deals also provides an opportunity to expand market share. All of these factors demonstrate significant potential for Unggul Taman to expand its business and increase its competitiveness in the market.

The threats facing Unggul Taman stem from the high level of competition in the distribution business. Furthermore, volatile raw material prices also pose a threat to business continuity. This situation can impact production costs and the company's profits. need anticipate threat the so that can maintain competitiveness and business continuity.

After do observation and interview, known location geographical Superior Park is at in the center of Makassar City, South Sulawesi, South Latitude, close to several offices, close to a number of campus And also near with House inhabitant, so that more allows to get share market Which more fast. Segmentation demographic Superior Park is man and women aged 15 to 35, ranging from schoolchildren to workers. Segmentation psychographics Superior Park is consumer Which like style life casual, expressive and follows and likes the latest fashion trends.

Target market Superior Park is public in City Makassar, man and woman with the target population is 15 to 35 years old, including students, college students, and workers. The following is a positioning map based on the products and designs of several Unggul Taman competitors, as obtained from the researcher's observations:

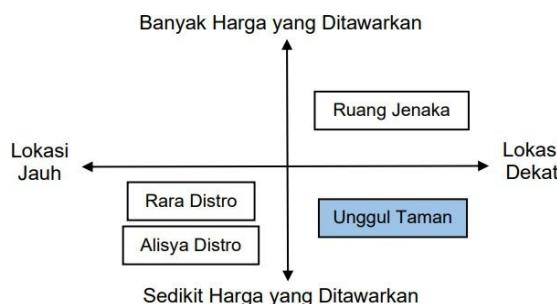

**Picture 2. Map Position Based on Product and Design**

Source: Researcher Data Processing Results, 2025.

Based on information Which obtained from observation and interview, known Superior Taman is superior in the number of products and designs offered compared to its three main competitors. Unggul Taman not only offering clothes t-shirts, but rather also offers several products like trousers and hat. Design Which offered Also is designs Which unique and in progress trends, besides That Superior Park Also provide service request design (making design) or the existence of designs from customers. Meanwhile, its competitor, Alisya, offers several products like dress, trousers And jacket, will but design services that offered no There is and there is only design which has been made, Ruang Jenaka only offers clothing and design products there is also only a little, Rara Distro just offer product dress And trousers jeans And Lots the design that offered, will but service design his No Can request design (making design). Design Which provided by Superior Park A little more Lots compared to with third the competitor. Matter Which differentiate is design services his like request design (design creation).

Here is the positioning map based on the prices and locations of several Unggul Taman competitors obtained from the results of the researcher's observations:

**Picture 3. Map Position Based on Price and Location**

Source: Researcher Data Processing Results 2025.

Based on Picture 3, known Superior Park more superior in price Which offered and also its location is close, namely in the middle of Makassar City which is included in the office area, housing area and campus. Room

Humor offer price tall will but the location too near and is at in middle City Makassar, whereas Rara Distro And Alisya Distro offers slightly lower prices but the location is far from the center of Makassar City.

According to data from the Makassar City Trade Office, the number of textile and apparel industries in Makassar City increased in 2023 compared to the previous year. show that on year 2022 amount industry This as much as 751 unit, whereas by 2023, the number of industries is expected to increase to 939. This growth in the number of industries reflects the significant market potential and increasing business opportunities in the apparel sector in Makassar City. With the increasing number of clothing businesses, the market in Makassar City is becoming increasingly competitive. competitive and dynamic. Condition This show that aspect market and marketing the clothing sector can be said to be feasible, so Unggul Taman as a business in the clothing sector is advised to continue innovate and increase capacity production with utilise existing market opportunities (One Data Makassar City, 2025).

### **Management Aspects**

The management aspect is one of the most important and inseparable elements in preparing a business feasibility study report. The success of a project or activity that has been declared feasible for development is greatly influenced by the role of management in achieving the project or activity's objectives. In a business feasibility study, the management aspect encompasses general management functions, including planning, organizing, implementing, and directing, as described by Trisnawati in Sultoni (2020).

According to Yusuf et al., (2023) in the book Management Theory, management functions are the main elements in management Which become guidelines manager for reach objective in a way effective and efficient. This function includes planning, organizing, managing human resources and controlling which are interrelated in carrying out organizational management.

Process planning on Superior Park use approach mixture between top-down and bottom-up interactively, where leaders and employees jointly discuss formulating innovative plans, involving all parties so that ideas are in line with the real needs and conditions of the company.

Strategy implementation Which done Superior Park that is compensation in the form of wages main, lunch and permits. Unggul Taman's control takes the form of supervision carried out directly by the owner and also by each division. The owner supervises the performance of the production and operations divisions. The production division supervises raw materials until they produce saleable products. The operations division supervises security and safety. Unggul Taman customer convenience.

Based on the research results, Human Resources (HR) at Unggul Taman still needs one employee for the marketing department as well as to carry out development and training so that... performance that can be produced optimal. Capital Superior The park is managed by One party, namely the owner of Unggul Taman, makes it easier to determine strategic plans and make decisions. Unggul Taman has a sufficient number of employees to run the business. This. Distribution task has arranged to each part so that no happen accumulation of tasks and not quite enough answer. Superior Owner The park ensures every part operate his responsibility with Good. Evaluation on aspect management it is said worthy, However It is recommended to develop human resources by providing training to improve the performance of Unggul Taman employees.

### **Aspect Technical and Operation**

The technical aspects of a business feasibility study concern the technical and technological aspects that will be used in the company. These technical and operational aspects encompass various key elements that will be used at Unggul Taman, including strategic production selection, product planning, and implemented quality plans. Unggul Taman also considers the selection of appropriate technology, production capacity planning, and business layout. By considering these aspects, Unggul Taman can ensure efficient business operations and high-quality products and services ( Daoed and Nasution, 2021).

Based on results study, location business Superior Park is at in Road Life Sumoharjo KM 4, No. 100 B, Pampang, Panakkukang, South Sulawesi. This location is popular with students due to its proximity to several campuses and numerous workers, making it a suitable location for a distribution business. Prime Location Park is at on the edge road so that each many days passed by the community, this can help increase public awareness of the existence of Superior Park. Superior Park will make as much as 500 pcs per month Because The sales target is 400 pcs per month, so Unggul Taman has 100 pcs reserves every month so that you don't run out of stock.

Based on information regarding infrastructure regulations by Greatnusa (2023), it is known that a business must meet safety standards, such as providing fire extinguishers to ensure the comfort of customers and employees while indoors. Unggul Taman does not yet meet the infrastructure standards for distro businesses, such as fire extinguishers. This presents a challenge because not all minimum facilities are available.

The layout for the new product from Unggul Taman uses a scale comparison of 4 meters x 12.16 meters, it can be seen that there are several facilities and infrastructure provided. Aspect technical And operation it is said worthy supported with election location Which appropriate layout, equipment and supplies availability, and a

well-thought-out planning agenda. This analysis plays a crucial role in ensuring the success of business diversification.

### Aspect Finance

Data collection for analyzing the financial aspects of a business feasibility study is conducted through observations of land conditions and documentation studies. Data analysis for the financial aspects involves analysis of capital requirements and investment feasibility, including payback period analysis. Period (PP), Net Present Value (NPV), Profitability Index (PI), Internal Rate of Return (IRR), Average Rate of Return (ARR), and Break Even Point (Nastiti, Wibowo and Suhandiah, 2023).

Based on the results of an interview with the owner of Unggul Taman, it was discovered that the initial capital to carry out business diversification comes from personal funds. At the beginning of the establishment Superior Park, only the owner manages his financial data which results in all forms of transactions being Superior Park No recorded with Correct, matter This Which make researchers do analysis Financial reports are prepared manually with the aid of records. Investment is the investment of capital by an investor to obtain a profit. Investment is typically made over the long term through the acquisition of fixed assets, the purchase of stocks, or other securities to generate profit (Nadila et al., 2023).

**Jumlah BEP Produk 1 + 2 + 3 = 5. 985**

Mark Break Even Point (BEP) Which obtained as much as 5,985 unit, It means that Superior The park must sell minimum 5,985 unit per year so that reach point break even (No make a loss And No profit). Therefore, based on the results of the financial analysis of Unggul Taman's product development business, it can be said that it is feasible to run it.

#### Aspect Law

According to Suliyanto, as cited in Syahputra et al. (2023), legal aspects concern the completeness and legitimacy of a company, from the form of the business entity to the permits and completeness of the documents. The validity of the documents is crucial because they provide the legal basis that must be adhered to should problems arise. According to Artiningsih (2019), to ensure the smooth running of a business, from a legal perspective, a business unit needs several legal entity documents.

Enterprises or businesses can fail due to legal issues or the lack of government permits, both at the regional and higher levels. carry out an idea business, analysis in a way deep and appropriate to aspect juridical must done so that later day business Which has implemented and executed No encounter legal and licensing issues. The legal aspect is the first to be examined. If a business idea is deemed unfeasible based on legal analysis, further analysis is unnecessary (Ermawati & Hidayanti, 2022).

The legal aspects of Unggul Taman are considered suitable for carrying out product development. business because it has fulfil legal elements, comply regulation and condition applicable laws such as a business domicile certificate and having a business registration number.

#### 4. Conclusion

On study This there is conclusion Which can taken that aspect market and marketing, management aspects, technical and operational aspects, financial aspects and legal aspects are said to be feasible because each aspect has fulfilled the criteria. There is. Each aspect has been analyzed in depth so that it can be concluded that the development of Unggul Taman's business products is worthy of being developed. implemented. Evaluation to these factors provide description that this business own opportunity Which Good For develop. Studies Eligibility Business show promising benefits for Unggul Taman.

The recommendation is to continue the implementation phase by diversifying the business and following the established business plan. This way, the product development of this business is expected to achieve its objectives and generate profits.
